

# Pest Management

David Jordan and Rick Brandenburg

Department of Crop and Soil Sciences

Department of Entomology and Plant Pathology

North Carolina State University

Raleigh, NC USA

# Value of Seed Treatments

Protection from soil-borne pathogens

**What are your pests?**

**What are your tools?**

**Essential in developing an IPM approach!**

**Pest management inputs very often pay for themselves!**

# Basic Pesticide Program

One preemergence herbicide (weed-free for first month is critical)

Two fungicide sprays for leaf spot and rust (R3 stage of growth)

One pyrethroid for worms/caterpillars
